Wall Mount
Features and Installation

iZone *Imaging*

DIRECTIONS

Mounting the Wall Clip

1. Locate studs or set anchors
2. Hold the clip horizantally at desired height, ensure level
3. Mark screw holes, pre drill and fasten securely.

Attaching the Panel Clip

1. Measure from top of panel to match wall clip height.
2. Center the clip on the panel (usually top edge)
3. Mark, pre drill, then attach clip with screws.

Hanging the Panel

1. Position panel so clips interlock, lowering it onto wall clip.
2. Check with Level.

TOOLS REQUIRED

- Screws & Anchors (if mounting to drywall/studs)
- Level
- Tape Measure
- Drill with Bits

Weight Matters - Choose clip size and spacing according to panel weight. Large/heavy items may need multiple clips.

Use Proper anchors for drywall. Optionally, apply thread-locker to screws on heavy panels.

- Material = Aluminum
- Custom Lengths Available
- Lift Off = 3/8 Inch
- Projection 1/4 Inch
